- ### Key Regional Insights
- San Diego generates highest customer revenue.
 - Major cities contribute most retained customers.
 - Customer value differs significantly by region.
 - Urban regions show stronger customer lifetime value.

📌 Conclusion and Recommendations

🎯 Project Objective

- The objective of this project is to identify customer churn patterns,
- analyze customer behavior, and generate actionable insights that help
- improve customer retention, customer lifetime value, and business revenue.

📊 Key Findings

- Overall Customer Churn Rate: 26%
- Customers on Month-to-Month contracts exhibit the highest churn risk.
- Fiber Optic customers show significantly higher churn compared to other internet service types.
- Customers with lower tenure are more likely to leave the company.
- Long-term contract customers demonstrate stronger loyalty and retention.
- High-value customers contribute significantly to revenue and require focused retention strategies.

💡 Business Recommendations

- 1. Encourage customers to switch from Month-to-Month contracts to long-term plans through discounts and loyalty benefits.
- 2. Implement targeted retention campaigns for customers within their first 12 months.
